HELPING CUSTOMERS GET QUALITY TECHNOLOGY TO MARKET QUICKLY, AT A LOWER COST

Polonix Corporation produces and distributes a range of highly engineered products and offers custom manufacturing services for manufacturers and distributors of technology products.

POLONIX EXPERTISE

Polonix offers expertise in three business areas:

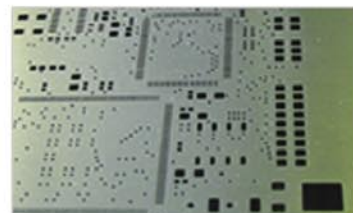

- Organization and management of electronics manufacturing and design services
- Building sales and marketing channels for quality products in a range of industries and markets
- Comprehensive supply management, procuring technology products for international clients

The company is made up of a team of accomplished business and engineering professionals with expertise in design, quality, manufacturing and marketing.

CUSTOMER BENEFITS

Polonix' corporate infrastructure allows for the design of systems to meet any parameter specification, with the utmost reliability and maximum flexibility. Our unique blend of technical skills and business acumen, combined with a network of international relationships with manufacturers and global distribution channels offers customers unmatched value by:

- Opening new markets on a global scale
- Facilitating access to the best manufacturing facilities in the World
- Reducing time to market while retaining product quality
- Delivering competitive advantage by optimizing business processes and reducing operating costs

POLONIX CONTRACT MANUFACTURING SERVICES

Polonix Corporation designs, develops and delivers a wide range of technology products to suit all budgets.

Focused on innovative solutions in information technology, telecommunications and process control, the company relies on its highly sophisticated research-and-development team and expert electronics manufacturing to lead development projects that deliver competitive advantage to our customers. We also manufacture to custom specification – from concept to after sale support, and anywhere in between.

Polonix contract design and manufacturing services help customers improve efficiencies in manufacturing without sacrificing quality by:

- Lowering manufacturing costs
- Reducing time to market
- Allowing customers to focus on core competencies
- Garnering a higher yield of production
- Making it easier to adapt to new market demands

Polonix offers both analog and digital circuit design expertise for a variety of applications. We focus on product solutions for:

- Process control
- Logistics
- Data and voice communications
- Test and measurement
- Information technology

OFFSHORE MANUFACTURING:

- Results in 5-20% reduction in manufacturing costs*
- Grants access to highly-skilled, motivated workforce
- Allows for competitive advantage through process efficiency

Bearing Point: Manufacturing & Technology 2004

WHY CHOOSE POLONIX:

Because success for Polonix comes from the success of our customers, Polonix forms close relationships with customers, with an aim to building long-term partnerships. We seek collaboration at every stage of the production process to ensure our clients have what they need to get products to market on time, within budget.

Polonix is committed to helping customers get quality new technology to market quickly, at a lower cost.
